# FitLife – Design Rationale

## 1. Project Overview

FitLife is a fitness appointment booking app designed to help users explore workouts, find trainers, and book fitness sessions easily. The main objective is to create a simple, user-friendly experience that makes fitness booking convenient and accessible.

## 2. User-Centred Design

The app is designed for beginners and regular fitness enthusiasts who want to book workouts without a complicated process. The clear navigation and organized content help users find the information they need quickly.

## 3. Visual Design

FitLife uses a minimal and premium visual style. Deep plum provides a strong, modern background, coral orange highlights important buttons and actions, warm ivory improves readability, and soft lavender adds visual balance. Consistent typography, spacing, and components create a cohesive interface.

## 4. Booking Flow

The booking journey follows a clear sequence: onboarding, sign up or login, home screen, workout selection,workout details, booking summary, payment method, and booking confirmation. This step-by-step flow helps users understand each stage and reduces confusion.

## 5. Usability and Interaction

The app provides workout categories, trainer information, date and time selection, and a booking summary so users can make informed decisions before confirming an appointment. Clear buttons, selected states, and payment options make interactions easier to understand.

## 6. Responsive and Consistent Design

The interface uses consistent colors, typography, buttons, and spacing across screens. The layouts are designed for mobile use, keeping important information and primary actions easy to find.

## 7. Conclusion

FitLife aims to make fitness appointment booking simple, clear, and convenient. By combining workout discovery, trainer selection, appointment scheduling, payment, and confirmation in one flow, the app provides a smooth experience from start to finish
